Dissecting An Air Conditioner

An air conditioner is a device, which is used to cool the air. People extensively use it across the world. However, there are certain things that you should look for when purchasing, installing and using an air conditioner.The Main Parts of an Air ConditionerThe compressor, the condenser and the evaporator are the three main parts of an air conditioner. Besides these, an air conditioner also has a hot coil and a cool coil on the out side and inside respectively. It has two fans and a control circuit to modify the temperature. However, the most important one of the lot is the compressor.The Compressor: This part can function for many years. If your air conditioner is old and the compressor has a fault, it can be replaced with a new one as well. Since the compressor is the part, which releases the cool gas, it is the most important part of an air conditioner. Most of the companies purchase a compressor from an external source and install it into their air conditioners.It is recommended that you buy an air conditioner from a company that makes its own compressors. Companies also give warranties on compressors.The Condenser: This is where the liquid is converted back into gas again. It is a very important part of an air conditioner unit. It can be replaced https://hosebrosinc.com/ if it develops faults.The coils can also be replaced easily. If a coil develops a fault, you may not get satisfying cooling results. Hence, it is recommended that you service your air conditioner regularly so that all the parts last longer.The external cover can be selected according to the colors and shades of your choice. It has no function except for providing a general appeal to the air conditioner.Usage ParametersDuring summers, we tend to reduce the temperature below 20 whereas the temperature outside is above 30. This is bad for your health and if you step out of the room after a long time, you can easily catch a cold. Also, drink lots of fluids as your body gets dehydrated if you are in the Air Conditioner for a long time.
