2. **The Ascent:** The plane climbs into the environment. During this phase, multipliers and bonus offers appear on the screen.
3. **The Climax (The Decision):** Players must decide when to bank their benefits or press further for higher multipliers, running the risk of a prospective crash or engine failure.
4. **Post-Flight Summary:** Performance metrics are evaluated, providing feedback on the flight course.

To better envision how the game scales in problem and benefit potential, consider the following structural breakdown:
