- **Sleepovers Made Easy:** Bunk beds are the ultimate weapon for weekend sleepovers, providing an instant visitor bed without the inconvenience of pumping up blow-up mattress.

Secret Safety Regulations in the UK

When purchasing children's furniture in the UK, safety is paramount. Bunk beds sold in the UK needs to stick to strict British and European security requirements to prevent accidents and structural failures.

1. **British Standard (BS EN 747):** This is the gold requirement for bunk beds and high beds sold in the UK. It dictates strenuous screening for structural stability, ladder design, and entrapment threats.
2. **Guardrails:** Both sides of the leading bunk need to feature secure guardrails. The distance between the bed mattress base and the top of the guardrail need to be at least 160mm to avoid nighttime rolls.
3. **Matress Depth Warnings:** Manufacturers will always specify a maximum mattress depth for the leading bunk. Neglecting this can reduce the efficient height of the guardrail, positioning a safety threat.
4. **Age Recommendations:** UK safety guidelines widely encourage that **children under the age of 6 must not sleep on the leading bunk** due to the dangers associated with falls and absence of coordination.
