- **The Martingale System:** A negative progression technique where players double their bet after every loss. The theory is that a single win will recuperate all previous losses plus an earnings equal to the initial stake. *(Caution: This requires a huge bankroll and can strike table limits rapidly).*
- **The Paroli System:** A positive progression strategy where players double their bet after a *win*. This profits from winning streaks while decreasing risk during losing streaks.
- **Flat Betting:** The safest and most disciplined method. Players wager the specific same amount on every single flip, securing their bankroll and extending playtime.
- **The D'Alembert System:** A more conservative progression where gamers increase their bet by one system after a loss and reduce it by one unit after a win.
