The objective is to "cash out" before the video game arbitrarily "crashes."

If a player squanders successfully, they win their initial bet multiplied by the existing figure. However, if the video game crashes before they squander, they lose their whole stake. The crash can take place nearly instantly (at 1.00 x), meaning some players lose before they even have a chance to respond, while other rounds can skyrocket previous 100x, 500x, or even greater.

Crucial Element of Crash Games
