## What is Crazy Time?

Released in 2020 by Evolution, Crazy Time is constructed on the enormous success of earlier wheel-based video games like *Dream Catcher* and *Monopoly Live*. Hosted by charming speakers in a dynamic, circus-themed studio, the game revolves around a giant, 54-segment mechanical wheel.

The main goal for gamers is basic: predict which section the wheel will stop on after the host gives it a spin. However, the video game goes far beyond standard thinking by incorporating a Top Slot multiplier feature and four immersive benefit rounds that can result in payments of approximately 25,000 x the gamer's stake.

### The Wheel Breakdown

To understand how the game works, one need to initially take a look at the circulation of sections on the main money wheel. There are 54 sectors in total, divided among numbers and bonus offer video games.

Segment Type Number of Segments on Wheel Payout/ Function **1** 21 Pays 1:1 **2** 13 Pays 2:1 **5** 7 Pays 5:1 **10** 4 Pays 10:1 **Coin Flip** 4 Activates the Coin Flip bonus round **Money Hunt** 2 Activates the Cash Hunt reward round **Pachinko** 2 Activates the Pachinko reward round **Crazy Time** 1 Activates the ultimate Crazy Time reward round

## The Top Slot: Doubling Down on Excitement

Before every spin of the main wheel, a two-reel **Top Slot** spins concurrently above the main video game. One reel arbitrarily chooses a bet spot (a number or a reward game), while the other reel picks a random multiplier (ranging from 2x as much as 50x).

If the bet spot and the multiplier align horizontally on the Top Slot, that multiplier is applied to the matching sector for that spin. If the primary wheel lands on that section, all wins for that number or benefit game are increased appropriately. This feature is the primary engine behind the game's most jaw-dropping payouts.
