If you run a local service business, your website has a job to do. It needs to work on a phone, make it easy for people to call, and help you keep up with leads without adding more busywork to your day. That is the practical side of web design Montgomery TX business owners usually care about most.

Scalable Websites is a website design company based in Montgomery, TX, built around that kind of straightforward need. Founded in January 2025 by owner Preston Toor, the company is veteran-owned and serves contractors, home service businesses, and local small businesses. It is a service-area business, so it meets clients in person across Montgomery County and greater Houston rather than working from a public office.

The team brings 10+ years of experience and 200+ websites built for home service businesses. That background matters when you need contractor website design that fits the way real service companies operate.

Built for Contractors and Local Service Businesses

A lot of small business website design sounds good on paper, but what matters is whether the site helps a customer take the next step. For many local companies, that means the website should be clear, mobile-first, and built to support calls and form submissions.

Scalable Websites builds and manages mobile-first websites for trades like roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and 30+ more. The company also handles custom web design, website redesign, custom WordPress websites, and website maintenance.

Every website includes the core tools many local businesses actually need:

- Click-to-call
- Google reviews shown on the site
- Custom lead forms with instant text and email alerts
- On-page SEO from day one
- Hosting and security

That setup makes sense for businesses that want a site that works hard without being complicated to manage.

A Simple Monthly Plan Structure

One reason some companies put off a new website is that pricing often gets muddy. Here, the plans are laid out plainly.

The Starter plan is $95 a month and is built as a single-page site. The Growth plan is $195 a month and includes 3 to 5 pages, plus missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics. The AI Enhanced plan is $295 a month and includes 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations.

Every plan comes with a 6-month minimum, then moves month-to-month. The client owns the site after 36 months, and there is a free design refresh every 36 months. New signups web design montgomery tx also come with a 30-day money-back guarantee.

That structure can be a practical fit for businesses that want a clear path forward, whether they need a simple first site or a larger website redesign with more room to grow.

Website Maintenance That Covers the Ongoing Work

For a lot of owners, the hardest part is not getting a site built. It is keeping it updated after launch. That is where website maintenance becomes a real issue.

Scalable Websites includes ongoing maintenance with unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For a contractor or small business owner, that can remove a lot of friction. Instead of wondering who is handling the edits, whether the site is secure, or what happens if something goes down, there is a defined maintenance setup in place.

That matters whether you are *contractor website design montgomery tx* starting from scratch or replacing an older site that no longer fits the business. A website redesign is not just about looks. It is also about making sure the site is supported over time.

Local Coverage Around Montgomery and The Woodlands

When people search for a website designer Montgomery TX companies can work with, local familiarity often helps. The same goes for businesses looking into web design The Woodlands or nearby cities. Service businesses often prefer working with someone who can meet in person and understands the local market area.

Scalable Websites meets clients in person across Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land. That service area covers much of Montgomery County and greater Houston.

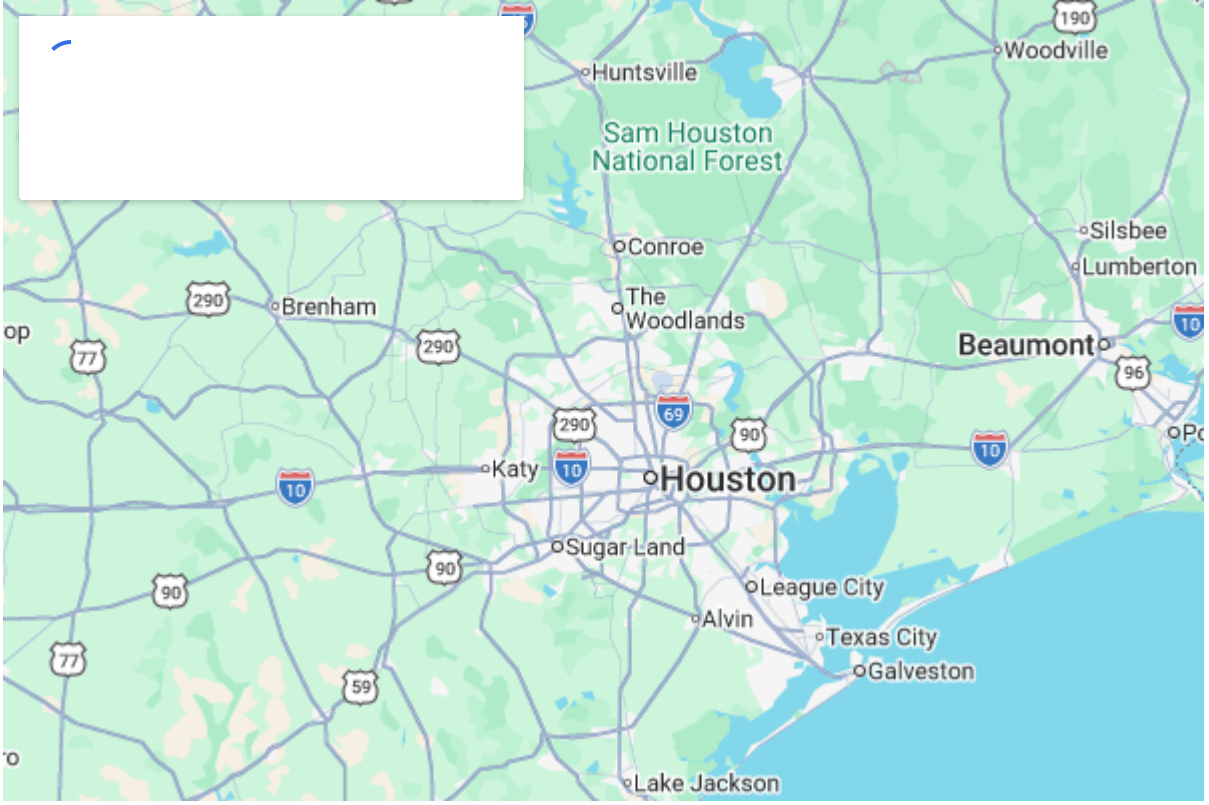

The company also holds a 5.0-star Google rating. For business owners comparing options for web design Montgomery TX, that can be one more practical detail to weigh along with plan structure, included features, and maintenance support.

For many local companies, the right website is not the flashiest one. It is the one that loads well on a phone, makes calling easy, shows reviews, sends lead alerts right away, and stays maintained month after month. That is the lane Scalable Websites works in, especially for contractors and other service-area businesses that need a site to support day-to-day operations.
