All participants in a battle contribute an equivalent buy-in-- usually identified by the cost of the cases being opened. As soon as the lobby is complete, the system instantly opens the picked cases for all gamers concurrently over a series of rounds. The goal is easy: **collect the greatest total financial worth of dropped skins by the end of the fight.**

The winner takes home whatever-- every skin visited all participants throughout the match. If luck is on their side, a gamer can win items worth multiples of their initial buy-in. If they lose, they surrender their invested skins.

### How a Standard CS Case Battle Works

2. **Buy-In:** Each individual locks in the needed funds or skins to match the total cost of the picked cases.
3. **The Roll:** The automatic system initiates the unboxing series. Each round exposes a skin for every single player in the lobby.
4. **Tallying the Score:** A live scoreboard tracks the cumulative market price of the items won by each individual.
