The goal for the player is basic-- place one or 2 bets before the round starts and struck the "Cash Out" button before the plane arbitrarily flies away (crashes).

If a player squanders successfully, their stake is multiplied by the present worth on the screen. Nevertheless, if the aircraft flies away before they squander, the bet is lost.

The game does not rely on paylines or card combinations. Rather, it uses a Provably Fair cryptographic system, making sure that every round's result is totally random and transparent.

 - *Bet 2* is left manual, intended at chasing after a greater risk/reward multiplier (e.g., 5.00 x or higher).

3. The High-Risk Approach (Chasing High Coefficients)

- **How it works:** Some gamers choose to wait out the lower multipliers, betting on the statistical probability of occasional massive spikes (50x, 100x, or higher).
