What Is Case Opening in CS2?

In CS2, a "case" is a locked container that gamers can purchase or receive as a drop. When opened, the case arbitrarily yields a weapon skin, sticker label, or other cosmetic item. Each case contains a pool of products divided into several rarity tiers, and the possibility of receiving any specific item is governed by a deterministic algorithm that mirrors the one used in CS: GO.

The case-opening UI is integrated straight into the video game's main menu. Players pick a case, pick a "crucial" (a separate purchase), and then click a single button to reveal [cs2 cases](#) the contents. The result is exposed with a brief animation, after which the item is contributed to the player's inventory and can be traded or offered on the Steam Community Market.

How the Odds Work

CS2's case-opening chances are publicly recorded by Valve. The algorithm utilizes a two-step system:

1. **Rarity roll**-- A random number figures out which rarity tier will be awarded (e.g., Mil-Spec, Restricted, Classified, Covert, or Rare Special Item).
2. **Item roll**-- Within the picked rarity, a 2nd random number chooses a particular skin.

Because the chances are fixed, the anticipated value of a case is merely the amount of (item cost × probability). While this does not guarantee a revenue, it provides a mathematical standard for players who wish to evaluate long-term expenses.

Common Odds (per opening)

Rarity Tier	Approximate Drop Chance
Mil-Spec (Blue)	~ 79.7%
Restricted (Purple)	~ 15.8%
Classified (Pink)	~ 3.2%
Covert (Red)	~ 0.65%
Rare Special Item (Gold)	~ 0.25%

These portions illustrate why getting a Covert or Rare Special Item is exceptionally rare.
