What is a CS: GO Case Battle?

At its core, a case battle is a multiplayer variation of the standard, solo case-opening mechanic. Instead of purchasing a case, opening it, and expecting the very best in seclusion, gamers get in a lobby where 2 or more individuals pool their resources to open the exact same cases simultaneously.

The mechanics are simple:

1. **The Buy-In:** Participants choose a set of cases and agree on the variety of rounds. The total expense of the cases functions as the entry fee for each gamer.
2. **The Opening:** Rounds play out sequentially. In each round, every player opens the designated case.
3. **The Scoreboard:** The worth of every skin dropped is tallied in real-time based upon current marketplace rates.
4. **The Winner:** At the end of all rounds, the gamer (or group) who has actually accumulated the highest overall financial worth of skins wins **all** the items dropped in the battle-- including those opened by opponents.

If luck is on a gamer's side, they can stroll away with an inventory worth significantly more than their initial buy-in. If luck fails, they lose everything. It is this high-risk, high-reward dynamic that drives the enormous popularity of the format.
