Stemming in the cryptocurrency gambling establishment sector, Limbo is a simplified variation of the timeless "crash" game mechanic. However, instead of watching a spaceship or a multiplier line climb upwards and intending to cash out before a crash, Limbo provides a more direct method.

Players set a target multiplier (e.g., 5.00 x). The game then creates a random multiplier. If the generated multiplier is equivalent to or greater than the player's target, the bet wins. If it falls listed below the target, the bet is lost.

The appeal depends on the control it provides the player. You aren't responding to a moving chart in real-time; rather, you pre-select your threat tolerance and see the results quickly.
