Unlike basic online slots that rely on random number generation (RNG) to spin signs throughout paylines, Big Bass Crash features a visual chart-- represented here as an angler attracting his catch-- where a multiplier constantly increases from 1.0 x upward.

The goal is simple yet nerve-wracking: gamers place a bet, enjoy the multiplier climb, and attempt to squander their payouts *before* the line inevitably crashes (or, in this case, before the fish leaves). If gamers squander in time, they win their stake multiplied by the existing value. If the game crashes before they squander, the bet is lost.
