If gambling establishments used a true 1:1 payment on a 50/50 game with zero home edge, it would be a break-even game for your house, which breaks the basic company design of gambling.

To keep a profit, gambling establishments adjust the payment chances or present a little cost.

Feature Fair Coin Toss (Real World) Standard Casino Coin Flip **Probability of Heads** 50.00% ~ 49.5% to 50.00% (depending upon RNG) **Probability of Tails** 50.00% ~ 49.5% to 50.00% (depending upon RNG) **Standard Payout** 2.00 x (Even Money) 1.96 x to 1.98 x (or 2.00 x with a 1-2% house cost) **House Edge** 0.00% Typically 1% to 3%

As displayed in the table above, your home edge is usually baked into the payment structure or taken as a tiny commission on winning bets.
