## What is Big Bass Crash?

At its core, **Big Bass Crash** is a multiplier-based crash game. If you have actually ever played popular titles like *Aviator* or *Spaceman*, the fundamental mechanics will feel familiar. However, the game covers these mechanics in the lovely, immediately identifiable audio-visual identity of Pragmatic Play's *Big Bass Bonanza* series.

Instead of enjoying a rocket or an airplane ascend, players watch the iconic bearded angler set off in his boat to capture a huge fish. As the boat crosses the screen, a multiplier value constantly increases, starting at 1.00 x and in theory climbing without an upper limitation.

The objective is basic: **Cash out your bet before the boat crashes or the line breaks.** If you successfully squander before the round ends, you win your original stake increased by the current value. If you wait too long and the game crashes, your bet is lost.

## How to Play: Step-by-Step

1. **Place Your Bet:** Before the round starts, gamers have a quick betting window. You can pick your stake manually or use the auto-bet feature.
2. **The Boat Departs:** Once the wagering window closes, the angler triggers on the water, and the multiplier starts ticking up from 1.00 x.
3. **Cash Out:** Players must keep an eye on the increasing multiplier and hit the **"Cash Out"** button before the round suddenly ends.
4. **The Catch (Partial Cash Out Feature):** Unlike many standard crash games, Big Bass Crash consists of a special "Cash Out 50%" feature. This permits gamers to secure half of their earnings while leaving the other half to ride for a greater multiplier.
5. **Round Ends:** The round concludes randomly when the line snaps or the boat stops. Anyone who hasn't squandered loses their active stake.
