- **The Game Control Unit (GCU):** Every single table is geared up with a GCU, which is a little encoder attached to the table that encodes the video and data broadcasted to the gamer's screen.

Live Blackjack vs. RNG Blackjack

Feature	RNG Blackjack	Live Blackjack
Card Source	Virtual (Random Number Generator)	Physical cards and basic shoes
Pacing	Managed totally by the player	Controlled by the dealership and video game round limitations
Transparency	Count on software audits	Noticeable physical actions and several video camera angles
Social Element	None (Solo play versus computer system)	High (Dealer interaction and live chat)
