

Interior drainage systems form the backbone of JLB Basement Waterproofing & Foundation Repair LLC's approach to keeping Des Moines area basements dry and free of moisture related damage. A typical system includes perimeter drain tile along the foundation walls, a sealed sump pump basin, and a vapor barrier to prevent moisture from penetrating the basement walls and floor. Once installed, the concrete floor is poured back smooth, leaving the basement ready for use as a finished or storage space without the risk of ongoing water intrusion.

JLB Basement Waterproofing & Foundation Repair LLC | 97 Indiana Ave Suite #1, Des Moines, IA 50314 | (515) 717-8560

JLB's approach to interior drainage is engineered for permanence, addressing the root cause [Basement Waterproofing](#) of basement moisture rather than a temporary patch that fails to solve the underlying problem. For an interior drainage system in Des Moines IA, contact JLB Basement Waterproofing & Foundation Repair LLC at (515) 717-8560.
