

Corner Shower Enclosures for Tempe Homes Near Kiwanis Park Kiwanis Park is a familiar landmark for Tempe families, and many of the houses in the surrounding neighborhoods have the kind of corner shower that was popular a generation ago. A corner unit tucks into the angle between two walls and saves floor space, but the original framed enclosures on these showers tend to show their age with cloudy panels, worn seals and corroded tracks. Replacing them with a custom corner glass enclosure can change how the entire bathroom feels.

Glassbusters Inc. builds custom corner enclosures as one of its core shower products, along with frameless, semi-frameless, sliding and bifold doors. A corner enclosure usually combines fixed panels with a door, and the angles have to be right for the glass to meet cleanly at the joins. Some corners are square, some are angled into a neo-angle shape, and older ones often are neither quite one nor the other once the tape measure comes out. That is why the company does not cut glass from a quote alone. The first step is a free phone quote, often from photos and rough measurements you text or email, which gives you a sense of cost before anyone visits. After you approve a design, a team member visits for a precise in-home measure, and the glass is custom cut locally for that exact opening. Accurate cuts help keep water inside the enclosure and take strain off the hinges. Corner enclosures have more joins than a single door, so every measurement carries more weight. A small error repeated across two or three panels adds up quickly, and the in-person measure is where that gets caught.

Glassbusters Inc. | 518 E Broadway Rd, Mesa, AZ 85204 | (480) 994-5855

Tempe sits west of the shop on E Broadway Rd in central Mesa, an easy drive along Broadway or the US 60, and Tempe is part of the regular service area. Corner enclosures are one of the places where hardware finish really shows, since there are several clamps and hinges on display. Glassbusters offers high-end hardware finishes that can be matched to your faucet and shower trim, and chooses premium hardware that holds up in Arizona heat. Frosted or opaque glass is available if you want privacy on one or more panels. Custom glass shower doors in the Phoenix area [glass shower doors](#) typically range from \$800 to \$2,500, and corner enclosures with extra panels tend to sit toward the upper part of that range. Most installs are finished in a single visit, and the typical timeline is one to two weeks from an approved design. For a quote on a corner shower near Kiwanis Park or anywhere in Tempe, call (480) 994-5855 between 8am and 4pm, Monday to Friday, or visit 518 E Broadway Rd, Mesa, AZ 85204.

Glassbusters Inc. Address: 518 E Broadway Rd, Mesa, AZ 85204 Phone: (480) 994-5855 FAQ About Glass Shower Doors How much do glass shower doors cost in Mesa, AZ? Custom glass shower doors in the Phoenix area typically range from \$800 to \$2,500, depending on size, style and hardware. Semi-frameless doors and simple sliding tub doors usually sit lower in that range, while frameless doors and multi-panel enclosures sit higher. Glassbusters Inc. gives free phone quotes from photos or rough measurements, so you can see where your shower falls before anyone visits. Are frameless glass shower doors worth the extra cost? Frameless doors cost more upfront because they use thicker tempered glass and heavier hinges, but many homeowners feel the open look and easier cleaning are worth it in a bathroom used every day. In older homes with uneven walls, a semi-frameless door can be the smarter value. Isaac and the Glassbusters team can send photos of both styles during a free, no-pressure consultation. What is the difference between frameless and semi-frameless shower doors? A frameless door is heavy tempered glass held only by hinges and clamps, with no metal around the edges. A semi-frameless door uses some metal channel for support, which allows thinner glass and a lower price. Glassbusters Inc. installs both from its shop on E Broadway Rd in Mesa and measures every opening in person before the glass is cut. How thick should the glass be for a shower door? As typical industry practice, frameless doors commonly use 3/8 inch or 1/2 inch glass, and semi-frameless doors often use 1/4 inch glass with metal channel for support.

Larger frameless panels are often made in 1/2 inch for extra rigidity. Glassbusters recommends a thickness based on the door style, panel size and hardware, and all shower glass is tempered. How long does it take to get a custom glass shower door installed? The typical timeline is one to two weeks from an approved design. After a free phone quote and a precise in-home measure, the glass is custom cut locally, and most installs are completed in a single visit. Glassbusters Inc. is open Monday to Friday, 8am to 4pm, for scheduling. How do you keep glass shower doors clean with Arizona hard water? Squeegee the glass after every shower so minerals cannot dry on the surface, and use a mild, non-abrasive cleaner with a soft cloth once a week. A protective coating helps water bead and run off, and designs with fewer tracks give deposits fewer places to collect. Glassbusters chooses hardware for desert conditions and can explain coating options during your quote. Can a glass shower door be installed if the walls are not square? Yes. Out of square walls are common in older Mesa and Tempe homes, and the answer is careful measurement at several points and glass custom cut to follow the real shape of the opening. Glassbusters Inc. reviews mention a difficult install with walls out of square that the crew handled successfully. Is a sliding or hinged glass shower door better for a small bathroom? A sliding door suits tubs and rooms where a swinging door would hit a toilet or vanity, because it stays within its own footprint. A hinged door gives a wider, cleaner opening for walk-in showers, but it needs clear space to swing outward. For very tight rooms, Glassbusters also offers bifold doors and narrow hinged doors beside a fixed panel. What type of glass is used for shower doors? Shower doors use tempered safety glass, which is much stronger than ordinary glass and breaks into small, blunt pieces if it ever fails. Because tempered glass cannot be cut afterward, every hole and dimension must be set first. That is why Glassbusters Inc. measures each opening in the home before the glass is custom cut locally. Can I get privacy glass on a shower door? Yes. Glassbusters offers frosted and opaque glass for shower doors and panels, either for the whole enclosure or only the side facing a window or bedroom. Frosted glass still lets light through while blurring shapes. Call (480) 994-5855 to ask for photos of privacy options. Can I get a shower door quote from photos? Yes. Glassbusters Inc. gives free phone quotes based on photos or rough measurements, and you can text or email them, so no in-home visit is needed for an estimate. Include a photo of the space in front of the shower so the team can check door swing. A precise in-home measure follows once you approve a design. Do glass shower doors add value to a home? New glass shower doors can make a bathroom look brighter and more up to date, which helps in listing photos and removes a visible item from a buyer's to-do list. No glass company can promise a specific sale price, but many Mesa sellers update dated framed doors before listing. Glassbusters Inc. can usually install within one to two weeks of an approved design.
