    - **Symbol Match:** Landing rare, premium signs on a designated payline.
4. **The Verification and Payout Phase:** Once the random number generator (RNG) figures out a winner, the aggregator right away locks the jackpot, resets the meter to its default "seed" amount, and initiates verification procedures with the operator to make sure regulative compliance before paying out the colossal sum.

While the prizes are smaller than WAPs, the chances of winning are often statistically greater due to the fact that fewer gamers are adding to and completing for the swimming pool.
- **Daily Drop/ Time-Restricted Aggregators:** Recognizing that waiting months for a huge jackpot can tiredness players, some aggregators utilize time-based drops. These systems guarantee that a jackpot *needs to* drop before a specific time (e.g., every day at midnight) or before the prize swimming pool reaches a specific threshold (e.g., must drop in the past striking ₤ 50,000).
